

Install a Photo Gallery

Step 1

Choose where you would like to display your gallery wall and measure the available wall space for the grouping. Only measure the space that will be used, not the entire wall.

Step 2

Look at sample wall gallery layouts on BellaPetPhotos.com and choose a layout that fits the space you have available.

Step 3

Use a ruler or yardstick to trace your layout onto the back of inexpensive wrapping paper. Tape your life-size template to the wall in the space you have chosen to see if you are happy with the art wall design. Save the template for use when your prints arrive.

Step 4

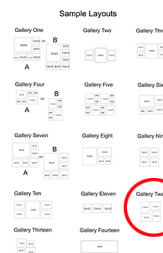

Write down the measurements for each piece of wall art. Make note of whether the print will be placed vertically or horizontally. Order your images. You have several options for the type of material to be used for printing. Be sure to check out my video on How to Order Photos from BellaPet Photos.com

Step 5

When your products arrive, lay them out on the floor on top of the template you saved. Mark on your paper exactly where your hangers will need to go on the wall.

Step 6

Tape the paper template to the wall again using painter's tape. Use a level to make sure your display will be straight. Tap in a small hole for each hanger placement, remove the template and hang your beautiful prints.

Note
2-V 11x14
2-H 11x14
